Detailed Action

Election/Restriction

1. Applicant's election of **claims 1-12** with traverse in the reply filed on 1-17-05 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Drawings

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character not mentioned in the description: 64 (Fig 4). Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the application regards as his invention.

4 **Claims 1-12 are rejected under 5 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.**

Claims 1-12 are indefinite in that claim 7 indicates that the at least one stacking head includes two adjustable holding members where claim 1 requires one adjustable holding member only. It is suggested that "at least one stacking head having an

Art Unit: 1734

adjustable holding member" (cl 1, L 4) be changed to -- at least one stacking head having at least one adjustable holding member --.

Allowable Subject Matter

5. Claims 1-12 would be allowable if rewritten or amended to overcome the rejection under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

6. The following is a statement of reasons for the indication of allowable subject matter:

claim 1: Hanson et al. (US 6,547,229) teach a stacking apparatus for assembly of electrochemical cells including a supporting structure and a stacking head (see part 120); however, Hanson et al. teaches a roller holding member and not the claimed adjustable holding member and the adjustable holding member's operability as claimed.

7. As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).
